PROFESSIONAL SUMMARY

Odoo Functional & Technical Developer | 1+ year experience in Odoo development & web development. Skilled in Python, JavaScript, MERN Stack, SQL, and ERP customization. Experience in Odoo project development and AI-based FYP projects. Certified in Odoo Functional and Technical Training. Looking to grow my career by building smart and efficient software solutions. I am a fast learner looking for a place that will help me grow my career, and I will do the same for that organization.

EXPERIENCE

Web Developer Intern

ICT Office, NUTECH

Jul 2024 – Sep 2024 | Islamabad, Pakistan

- Managed and maintained university websites, improving website stability and reducing technical issues.
- Developed a career prediction platform that analyzed students' academic performance and preferences to suggest future job opportunities.
- Collaborated with a development team to ensure system uptime and smooth performance of multiple university web applications.
- Assisted in building a secure e-testing platform designed to support safe and reliable online examinations nationwide.
- Improved website functionality and user experience through regular updates, debugging, and backend support tasks.

Odoo Developer

ICT Office, NUTECH

Jul 2025 – Present | Islamabad, Pakistan

- Managed and maintained university ERP modules including CMS, Registration, Finance, Admissions, and Employee Management, supporting daily operations for multiple departments.
- Developed a customized HRMS in Odoo using Python and XML, improving employee management efficiency by 40%.
- Designed and implemented a trading module in Odoo to automate trading workflows and simplify operational processes.
- Generated and analyzed reports such as vendor lists, ERP module performance, and operational records, improving reporting accuracy and decision-making.
- Conducted Odoo functional and technical training sessions for university students, helping train future ERP developers and functional consultants.

PROJECTS

FYP Weed Detection System

Jun 2025

Developed an AI-based Weed Detection System using YOLO models to identify weeds in wheat crops with an accuracy of 93.8%.
Collected and prepared a custom dataset for model training and testing to improve detection performance. Trained and evaluated multiple YOLO models to achieve accurate real-time weed detection results. Built a mobile/web application with integrated APIs to capture crop images and display weed detection results efficiently.

Tech: Kotlin · Python · Yolo · Firebase · Flask

VOLUNTEER

Ramzan Donation Drive

Unity Volunteers

2026 – Present | Islamabad, Rawalpindi

Collected donations and essential supplies during the Ramadan donation drive to support needy families. Distributed ration packs and daily necessities to underprivileged communities. Collaborated with different organizations to organize and manage 30-day Iftar drives during Ramadan. Assisted in community support activities and helped provide aid to people in need.
